Customer Problem Statement

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	An End User / Requester	Submit a network service request through Service Portal and see its status	Manual effort can slow request fulfilment and reduce visibility	Simple, intuitive submission process and centralized tracking are needed	Concerned about turnaround and request visibility
PS-2	An IT Admin	Manage ServiceNow configurations and workflows with minimal manual intervention	Manual work can increase the ticket workload	Reliable automation and easy change management are needed	Concerned about manual workload

Define the Problem Statement

USER Employees who request network services, plus IT admins, network fulfilment team members, and approvers.	PROBLEM Manual effort and human error can affect network request fulfilment, while standardized workflows, approvals, and centralized tracking are needed.
NEED Catalog creation, form design, approval routing, Flow Designer automation, and email notifications.	IMPACT Reduce manual effort and human error; accelerate request fulfilment; standardize workflows and approvals; improve visibility and tracking; enhance end-user experience; ensure compliance with IT and security policies.
HOW MIGHT WE? How might we streamline and automate the end-to-end lifecycle of network-related service requests using ServiceNow?
