Student Name	Jetti Harika
Project Name	Automated Network Request Management in ServiceNow
Maximum Marks	

Empathy Map Canvas

Dimension	End User / Requester Perspective
Says	Needs a simple and intuitive way to submit a network service request; expects faster turnaround and clear status visibility.
Thinks	Wants the request form to clearly capture the required information, expects the process to be straightforward, and wants visibility into request status.
Does	Accesses the ServiceNow Service Portal, searches for Network Requests, fills in the required request details, and submits the request.
Feels	Wants a faster and more reliable service experience; may feel uncertain when status visibility is limited.
Pain Points	Manual effort, incomplete request information, human error, lack of clear status visibility, and slower request fulfilment.
Needs / Goals	Simple and intuitive request submission, fast turnaround, status visibility, faster request fulfilment, and reliable service delivery.

End User (Requester) — Empathy Map

SAYS “I want a simple and intuitive way to submit a network service request.”		THINKS Wants the request form to clearly capture the required details and expects a straightforward process.
	REQUESTER	
DOES Accesses the Service Portal, searches for Network Requests, fills in the required details, and submits the request.		FEELS Wants a faster, more reliable experience; may feel uncertain when status visibility is limited.

Pain points: manual effort • incomplete request information • human error • limited status visibility • slower fulfilment
